

ABSTRACT OF THE DISCLOSURE

1 A folding seating apparatus, for on-board stowage of an optionally deployable
2 passenger seat, in a vehicle having a floor defining a floor surface that may be entirely flat
3 when the seating apparatus is stowed. The seating apparatus includes a stowable seat
4 having a seat cushion supported on one or more legs above the floor, a seat back that is
5 foldable upon the seat cushion for stowage of the seat, and a seat receiving recess in the
6 floor for on-board stowage of the seat. The seat is movable transversely in the vehicle in
7 addition to being stowable.
